**INNCOM, LodgeNet Team Up For TV-Based Room Control At IH/M&RS**

NEW YORK—Here at the International Hotel/Motel & Restaurant Show today, INNCOM and LodgeNet Interactive Corp. displayed a new solution that enables INNCOM's guestroom technologies to be accessed over the LodgeNet television platform.

With this arrangement, guests and hoteliers will now be able to control or monitor in-room climate, lighting, drape positioning, fan speed, radio and volume as well as guestroom status.

INNCOM also unveiled a design-centric, energy-management solution made of recyclable glass that controls room temperature, lighting and other functions. The new technology is collectively known as the Glass Series Smart Digital Thermostat, Switch and Tabletop Controller.
