

INNCONTROL 5

Property-Wide Guestroom and Energy Management

INNCOM INNcontrol 5

The performance you need. For the experiences guests want.

Introducing the industry's most intuitive, powerful platform for guestroom automation and energy efficiency: INNCOM INNcontrol 5.

Define the key performance indicators (KPIs) that matter for your operations and give your teams real-time insights with KPI dashboards, mobile alerts, cloud hosting options, and more.

And by integrating key systems like property management (PMS) and central electronic locking (CELS), you can further enhance the insights and capabilities that IC5 delivers.

Custom Dashboards for Real-Time Monitoring

Easy to read and understand in a glance.

- Monitor energy use by room, and property-wide.
- Track energy usage to gauge return on investment.
- See rental and occupancy statuses in real time.
- Track overall system health, and more.

Mobile Alerts for Operational Efficiency

Fulfill requests faster. Reduce downtime for rooms.

- Make-up room and other guest requests.
- Comfort alarms such as unusual humidity levels.
- Rooms that go offline or have other status issues.
- Equipment alarms for real-time and predicted issues, so you can respond before guests are affected.

Intuitive Interface for Powerful Control

Optimized for desktops, tablets, and mobile devices.

- Easy to navigate and use in the office or on the go.
- Customize room settings, like temperature setbacks.
- Adaptable yet straightforward user experience for increased productivity and faster training.

Home and Building Technologies

Big-Data Analytics for Informed Decisions

Insights to optimize your operations and investments.

- Gain a deeper understanding of guest preferences.
- Customized reports and analysis based on your KPIs.
- Predicted trends and proactive recommendations such as where to focus preventive maintenance.
- Quickly identify poorly performing rooms to increase guest comfort and reinforce your bottom line.

Open IoT Platform for Easy Integration

Optimized for hospitality and the Internet of Things (IoT).

- Reports guestroom data from the INNCOM e7 thermostat, room sensors, and other smart devices.
- Powered by the proven Niagara platform for easy, secure integration of third-party devices and systems.
- Backward compatible with IC3, and future-proof for the next generation of IoT devices.

Secure Cloud Hosting for Cost-Effective Access

Your choice: Install on premise, or access via the cloud.

- Simplifies both centralized and onsite management.
- Automatic software updates deliver latest features.
- Secure mobile access, as well as enhanced data security and backups.
- Flexible pricing choices, including subscription options.
