

# INNCOM S563 / EV564 INNTOUCH DND AND MUR CONTROLS

INNCOM INNTouch guestroom annunciation system is a two-component solution that provides INNTouch guests with a convenient method of communicating their privacy and service preferences.

## GUEST PRIVACY & DOORBELL ANNUNCIATION CONTROLS

INNCOM INNTouch controls give guests greater privacy and convenience, while helping housekeeping staff respond to requests more quickly and accurately. Electronic controls also eliminate the need for clumsy doorknob tags, which are less discrete, less precise, and visually less appealing.

The EV564 Guestroom Annunciator and DND / MUR Control is located inside the guestroom and provides a guest interface. The guest can press a button to request privacy or room cleaning. The S563 Corridor Annunciator and Doorbell Control is located in the corridor outside the guestroom and displays to staff the preference selected by the guest from inside the room. If the guest presses PRIVACY, the word 'PRIVACY' is written in red on the S563; if the guest presses MAKE UP ROOM, a green light appears on the S563 to alert staff. The S563 also contains a doorbell, which chimes in the guestroom via the EV564.

For further convenience and discretion, the room can automatically alert staff when it's occupied by integrating these controls with a door switch and a motion sensor inside the guestroom (including the motion sensors that are part of most INNCOM thermostats). This spares staff the need to ring the doorbell to determine occupancy, and prevents accidental intrusions into an occupied room – further improving service, efficiency, and privacy.

Evora Platform

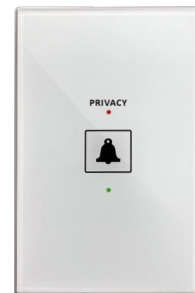

S563 Corridor  
Annunciator and  
Doorbell Control

EV564 Guestroom  
Annunciator and  
DND / MUR Control

Modeva Platform

GS564 Corridor  
Annunciator and  
Doorbell Control

GS564 Guestroom  
Annunciator and  
DND / MUR Control

Provides a doorbell for pleasant, efficient requests for entry

RF wireless or S5bus communication

Easy way for guests to communicate privacy and service preferences

Reduces need for intrusions by staff

Improves operational staff efficiency

May be used as part of the Integrated Room Automation System over the Deep Mesh Network with INNCOM INNcontrol software

S563 / EV564 SPECIFICATIONS	
<b>DIMENSIONS</b>	British Gang: 86mm W x 86mm H American Gang: 2.75" W x 4"H
<b>INPUT VOLTAGE</b>	110-240VAC, 50/60Hz
<b>DC VOLTAGE/OUTPUT</b>	12VDC, 300mA
<b>OPERATING TEMPERATURE</b>	32-104°F (0-40°C), 0-95% rH non-condensing
<b>APPROVALS</b>	FCC Part 15
<b>STANDARD HOUSING COLORS</b>	Black and White

For indoor use only

S563 / EV564 INNtouch devices are available on EVORA, MODEVA, Elements, and Designer Series platforms. We can also work with EEC Industries for custom S563 / EV564 applications.
